

FCC,

As a US citizen I have been increasingly concerned that media's message has been increasingly promoting a simplistic corporate agenda that is not serving the citizens or the country. We must further limit corporate hegemony of the television and radio markets when information is so aggressively controlled and spun by mainstream outlets, when American cultural viewing habits are so limited, and when so much of America's sick democracy is dependent upon unbiased diverse sources. Please reverse this aggressive corporate push for more control when the future of America is at stake.
